

# Scan700

## Professional Wireless

# Frequency Agile UHF AutoScan Wireless

*Real. Reliable. Professional.*

The next step in Ansr Audio's 700 channel wireless line brings professional features together with dependability and ease of use to deliver a system designed to satisfy experts and first-time users alike.

The 700 FCC-safe UHF frequencies span six television channels (40 - 45) to provide the installer maximum flexibility of operation. AutoScan channel selection finds the next open frequency to allow the Scan700 to easily fit into any install environment. In addition, the Scan700 includes four groups of eight channel presets. Excluding outside interference, the preset groups provide quick multi-system setup free from channel interaction.

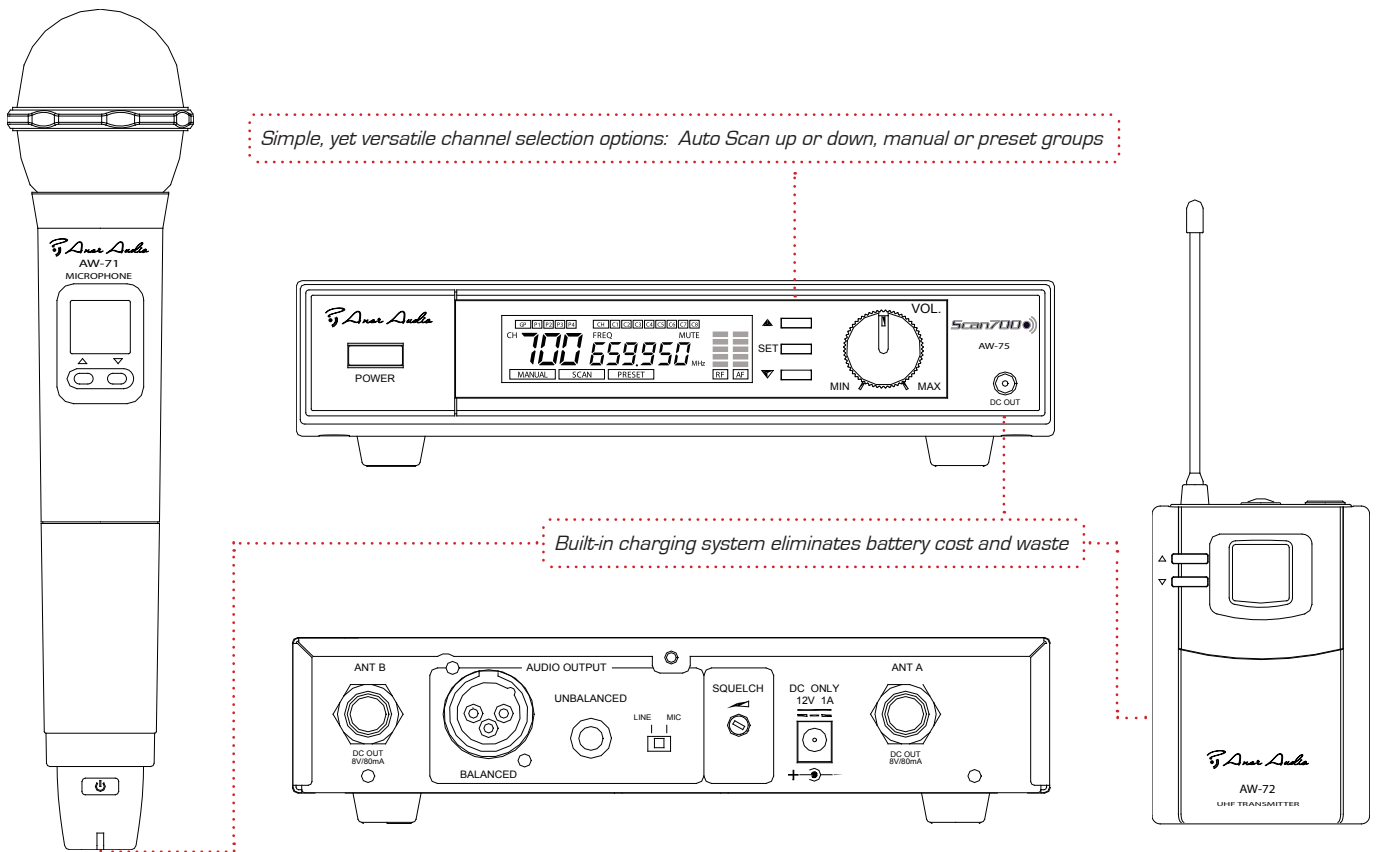

The built-in recharging system eliminates battery cost - simply connect the transmitter to the receiver with the supplied charging cable and the rechargeable batteries are always ready to go.

Available in a variety of packages, the Scan700 provides premium performance and superior sound in any situation.

## FEATURES

- 700 FCC-safe UHF frequencies
- AutoScan, manual or preset channel selection
- Built-in recharging system
- RF, audio and battery monitoring
- Front panel volume control
- XLR and 1/4 inch outputs
- Mic / Line output selector
- Rear panel squelch adjust
