5400 Watts

SET UP IN LESS THAN 5 MINUTES...

PLUG and PLAY!

In countless occasions, many of you have requested a compact, stackable, high power, easy to install system, which can be enlarged when you need a line array application for big events. Now it is ready! The **X-COMBO**.

"Xcellence" finish.  
Stainless steel,  
black painted.

Easy and fast mounting  
through ball lock pins.

Easy adjustment through  
"STACK-2" preset.

Adjustable inclination.

The **X-COMBO** is the combination of 2 units of X-210 stacked on X-218W subwoofer with the dedicated FR-X218W frame. The result is exceptional: easy to install, easy to adjust (X-210 "STACK-2" preset), a plug-and-play system with unbeatable performance and sound quality. The system is suitable for events up to 2.000/3.000 people, so it will be appreciated by those rental companies and bands that need a lot of mobility and a high-quality system, easy to handle.

In addition, the system has the advantage that it can "grow" when needed, and can become into a fantastic "big" line array system.

As all Xcellence products, the stacking FR-X218W frame needed for this configuration is made of stainless steel, and allows tilting the X-210 towards the audience. Try it... and you will surely find unlimited applications.
